Hi Murali,

I have attached the test with the accompanying email.

"Please find my exercise in the attachment and the description to it below:

The zip file contains project that is missing both ViewModel and View, but contains needed models, factorisation and serialization classes.

This should be a user management panel, with functionalities:

- User can be created,

- User can be removed,

- New properties can be added to user,

- Existing properties can be updated.

Writing missing functionality should take about 30 minutes.

If we could ask potential candidate if he can write missing code it would be great."

Kind Regards,

Cameron

Interaction Recruitment - Number 1 General Recruiter 2010 (RBS sponsored HOT 100 Listings)

_____

Interaction Recruitment is one of the UK's fastest growing independent recruitment businesses, delivering a broad range of Staffing and HR Services nationwide. To find out how Interaction can support you, go to www.interactionrecruitment.co.uk or contact your nearest branch, as detailed.
